

## DUCT LINE PLASMA. CUTTING LINE, PLASMA CUTTING WITH AUTOMATIC PITTSBURGH PROFILE

Cutting line specially designed for straightening, ribbing, punching (optional), cutting using a program, and making the Pittsburgh profile from a coil of metal sheet.

### TECHNICAL INFORMATION

- Effective width	1500 mm
- Maximal coil weight	5000 Kgs.
- Max. cutting thickness of galvanized sheet	1.2 mm
- Max. cutting thickness of stainless steel	0.8 mm
- Min. thickness	0.5 mm
- Positioning accuracy	+/- 0.25 mm
- Adjustable speed	5-15 m/min.

### COMPONENTS

- Guidance system and straightening station.
- Ribbing station.
- Punching station (Optional) .
- Cutting station.
- Plasma cutting module.
- Pittsburgh profiler.
- Numerical control.
- Hydraulic equipment.
